"Before starting college, I was a PC user. Since then I bought a Mac because I didn't want to worry about viruses when connecting to the Internet. With my MacBook I have peace of mind!"

Rashid - Student in Social Studies

"What I enjoy the most with my Mac, is that I can work with Windows specific software, as well as with Mac OS X to create my own blog, share my photos or do video-conferencing."

Mirella - Student in Financial Management

Mac Mini desktop
option from
Rs.820 per month!*

Top reasons why a Mac is the better choice for your studies.

207,684 PC viruses ? Not on Mac!

A Mac is **safe** from **PC viruses**. And although no computer connected to the Internet is 100% immune to all online threats, the Mac is built on a **solid** UNIX foundation and designed with **security** in mind.

Made for today.

A Mac is **built for** the way people use computers **today**, both at home and at work. **Yes**. You can connect to networks (both Mac and PC). **Yes**. You can run Microsoft Office. **Yes**. You can run Windows.

The best Operating System.

No other operating system offers the **innovation** and **simplicity** of a Mac. With Mac OS X, the Mac leaps even further **ahead** with new features that let you do **more** with less effort.

For the whole family.

Everything you've always wanted to do on a computer, like browsing the web, checking email, organising your photos, making movies, learning to play music, and **more**, are some of the things the Mac does **best**.

Born ready.

Unlike other computers that require you to spend hours configuring devices, a Mac connects **instantly** to your digital camera, wireless device, printer, or external drive.

Instantly Wireless.

All new Mac computers are **Wi-Fi capable**. Just select the network you want to join, enter a password if necessary, and you're **ready** to browse the Web.

iLife - The killer software suite.

"Out of the box, the Mac has better photo, music, video, and DVD-creation software than any Windows computer..." - The Wall Street Journal.

iLife comes **standard** on every Mac.

Intel Inside.

The most **advanced** chip in the world today. It can do in a Mac much **more** than it would ever do in a PC.

All inclusive price.

What you pay for as **extras** elsewhere, comes as **standard** on a Mac.

Visit our showroom to discover which Mac is best for you .
